- We are approved for an $\$ 11,000$ grant. Looking at math program and specifically Singapore Math. Some teachers will go for training and then come back and share out. Our school could go in several different directions: One is just adding tools to our tool belt to increase the rigor of how we teach. Another is adopting it. Finally, the third is that we use components of it. Singapore Math works to help students conceptually grasp math concepts. It aligns to our Florida Standards. It also helps students visualize it more. Next month we will report back and what we've learned about Singapore Math.
