Old Business-

- **School Improvement Plan- Mrs. Matheny-** Mrs. Matheny discussed with the SAC members that the School Improvement Plan is in its preliminary stages. It currently has 3 focused goals;
 1. All students in sub groups make learning gains in English Language Arts.
 2. The Schools staff is focused on personal development in Science. The school will be hosting Dr. Chew to help further our understanding of science instruction.
 3. PBIS expectations through out the school. We are highlighting STAR Mighty Mustangs who are elected by their teachers each week. We will also be recognizing student behavior through our awards night, and 2nd and 3rd recognize a STAR student of the month.

Mrs. Matheny discussed our schools overall results from the 2018/2019 school year, and explained the matrix breakdown. Mrs. Matheny explained that during our back to school trainings teachers could see just by moving 9 students in the bottom quartile it can positively effect our overall score. Alma Camacho inquired about after school tutoring for Reading and Math. Mrs. Matheny explained that we are currently finishing up gathering and analyzing beginning of the year data on the students. Once we look at that data, we will begin planning our afterschool super star camp for students in need of tutoring.
